

RITHERDON

C T Chamber – U K Power Networks

Used in the 'SEEB' and 'Eastern Electricity' areas.

Description: It is a GRP Enclosure 745mm x 535mm x 300mm deep. The meter and CTs are not included. The backplate including equipment and the mounting plate including the terminal rail are packaged separately from the GRP box. This is to overcome the overall weight and so that the box can be mounted and the plates fitted after.

Ritherdon – September 2012
