## CABLE PROTECTION TAPE

### Heavy-duty flexible tape system

Tapetile cable protection tape is a flexible product supplied in roll format. Tapetile cable protection tape is manufactured from heavy duty, recycled polyethylene and, while flexible enough to be delivered in a roll, it provides a high level of durability. Extremely cost-effective in use, the tape is designed to provide a clear visual warning when uncovered.

Tapetile cable protection tape is normally used for lower voltage electric cables, street lighting cables, fibre optic and other communication cables as well as for gas and water pipelines.

Installation is a simple matter of unrolling the tape in the trench, where it provides highly efficient and very cost-effective protection to underground cables.

#### Advantages

- Clear visual warnings when uncovered
- Flexible and lightweight
- Fast and easy installation
- Extremely cost-effective in use
- Approved and used by utility companies throughout the world

#### Typical applications/colours

<b>Low voltage electric cables</b>	Caution
<b>Water pipes</b>	Caution
<b>Gas pipes</b>	Caution
<b>Telecoms</b>	Caution

Cable Protection Tape can be supplied to order in different colours. Utility company names/logos can also be printed on covers for identification purposes. Message can be in English or any language specified.

#### Standards and approvals
