100pcs

ISO9001Accredited

Foundation bolts NO2 are a galvanised steel plated pin that secure bracket cable bearers to channel brackets. There are two variants, NO1 for cross connection cabinets and NO2 for fixing cable bearers in concrete and brickwork.

Foundation bolts NO2 are manufactured in galvanised steel, to ensure that corrosive substances are unable to reach the underlying steel. This ensures that the bolt keeps its structural integrity when secured to fittings.

Dimensions 12.7mm Diameter x 125mm Length

BC BARTON INTERNATIONAL - MANUFACTURING CAPABILITIES

CNC Metal Stamping

CNC Metal Punching

Metal Folding

Metal Laser Cutting

CNC Milling

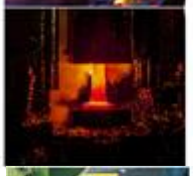

Metal Welding & Assembly

Screws and Fasteners

Aluminium Formwork

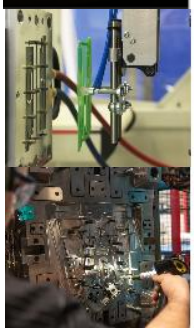

Hot Forging

Expendable Mold Casting

Drop Forging

Permanent Mold Casting

Steel Formwork

Plastic Injection Moulding

Aluminium Extrusion

Rubber Moulding

PROVIDING THE COMPLETE METALWORK SOLUTION

Supplying medium to high volume precision manufactured products. Utilising a diverse range of metal manufacturing capabilities. Available in a wide range of high-performance aluminum, stainless steel, copper, bronze, nickel, and mild steel materials.
