MOQ

100pcs

Capping Steel NO1 is a 2440mm long by 76mm wide galvanised steel section, featuring a 19mm internal radius and pre-drilled holes for easy fixing to wooden poles.

It's designed for use on a range of pole types, including transmission, telephone, telecommunication, power, hydro, and telegraph poles.

Maintenance engineers use this steel capping to protect exposed cables from weathering and potential tampering. The internal radius allows for up to 19mm diameter cable trunking space, offering a neat and effective solution for guiding and shielding cabling.

Manufactured from galvanised steel, Capping Steel NO1 offers long-lasting resistance to corrosion. This ensures the fitting retains its structural integrity and provides reliable cable protection over many years.

BC BARTON INTERNATIONAL - MANUFACTURING CAPABILITIES

CNC Metal Stamping

Metal Folding

CNC Milling

Screws and Fasteners

Hot Forging

Drop Forging

Steel Formwork

Aluminium Extrusion

CNC Metal Punching

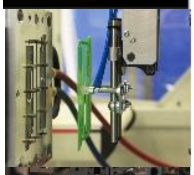

Metal Laser Cutting

Metal Welding & Assembly

Aluminium Formwork

Expendable Mold Casting

Permanent Mold Casting

Plastic Injection Moulding

Rubber Moulding

PROVIDING THE COMPLETE METALWORK SOLUTION

Supplying medium to high volume precision manufactured products. Utilising a diverse range of metal manufacturing capabilities. Available in a wide range of high-performance aluminum, stainless steel, copper, bronze, nickel, and mild steel materials.
