W1R WORK Rechargeable ClipLight(220)

W1R Work

PRODUCT DESCRIPTION

Ultra-compact, powerful, versatile: The Ledlenser W1R Work is a handy clip light for trades people, security personnel and DIY fans. It can easily be attached at any time by clip or magnet, e.g., to work clothing, caps or metal surfaces. The superior Ledlenser light quality provides precise illumination in two different brightness levels. With its 360° swivel joint and swivelling lamp head, the W1R Work provides light exactly where it is needed. The integrated battery can be charged quickly and easily via USB-C. Other features include a nubbed surface for a strong grip, a handy transport lock and a low battery warning function.

- Ultra-compact, rechargeable clip light with two brightness levels
- 360° swivel joint and swivelling lamp head for precise and flexible illumination
- Flexible mounting via robust clip or magnet
- Integrated li-ion battery; easily rechargeable via USB-C, with battery and charge level indicator
- Transport lock prevents light from being accidentally turned on

FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

1) Measurement values according to ANSI FL1 in the respective setting. If no setting is explicitly indicated, the values refer to luminous flux (lumens/lm) and lighting range (meters/m) on the highest setting, and to battery duration (hours/hrs/h) on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If the light is equipped with (a) colored LED(s), the measurement values are given for the white light or the white LED. If the light has different energy modes, the measurement is made based on the “energy saving mode”.

2) Calculated capacity value in watt-hours (Wh). This applies to the delivery state of the battery/ies inside the respective item, or for lights with rechargeable battery/ies, to the rechargeable battery/ies inside the product when fully charged.

5) Charging time varies by hardware used.
